

Katedra fyzickej geografie a geoekológie

PriF UK v Bratislave

si Vás dovoľuje pozvať na sériu prednášok
v utorok 6. júna 2017 v zasadačke katedry B1-444
o 13:30 h

Piotr Szwarczewski
University of Warsaw, Faculty of Geography and Regional Studies

Natural and anthropogenic environment changes during the Holocene - records in fluvial, lake, aeolian and slope environments (examples from Poland and Slovakia)

The use of archival topographical maps for land use changes and river channel pattern analyses (examples from Central Poland)

a cca o 15:00 h

Ewa Smolska
University of Warsaw, Faculty of Geography and Regional Studies

Record of soil and gully erosion in sediments on examples from lakeland area (Płock area and Suwałki Lakeland)

The slide features a main landscape image of a lake and fields. Two inset photos are included: one showing a soil profile with a wooden stick for scale, and another showing a gully in a field.

Vítaní sú všetci záujemcovia i študenti všetkých ročníkov a programov
